WE THINK AHEAD FOR YOU A MATTER OF COURSE AND IN A CERTAIN MANNER

The challenges for companies, shareholders and managers under corporate law are complex and constantly changing. Requirements for which sustainable solutions must be found: Legally and fiscally watertight as well as economically sensible.

Our proven experts in corporate law have many years of experience in advising companies ranging from shareholder-managed enterprises to global corporations. We accompany our clients safely through the complex framework conditions in every phase of the business and offer customised and sustainable solutions. Crossborder economic activities require international solutions. Through the international Schindhelm Alliance, the knowhow and resources needed for efficient implementation of cross-border solutions are available.

Start-up advice

In the run-up to a business activity, the question regularly arises as to the legal form in which the activity is to be carried out. An analysis of the respective concrete needs to select the appropriate legal form as well as sound advice on the implementation of start-ups, but also of project companies, are of central importance in this phase. In particular, when drafting company or syndicate agreements, we develop individual solutions with you and anticipate possible future developments in both company and tax law.

General corporate law advice

We accompany companies in all phases of their further development. This requires not only excellent legal knowledge, but also a comprehensive understanding of economics.

Ongoing advice on corporate law includes, in particular, the convening and attendance of shareholders' meetings, the implementation of capital measures, advice on planned changes in the respective company bodies or at shareholder level, such as company succession.

Restructuring measures

The reasons for restructuring measures can be manifold, but in any case require optimal planning from both a corporate law and a tax perspective. Another focus of our work is the planning and implementation of restructuring measures of all kinds, up to and including restructuring in the event of a crisis. Whether mergers, demergers, contributions of shareholdings or changes of legal form are involved - our lawyers have years of experience in advising on national and international restructuring processes and develop options for action tailored to your needs.

Conflict resolutions

The development of sustainable solutions also means reducing the risk of protracted disputes under corporate law in advance through clear and precise regulations in articles of association and shareholders' agreements. In the event that a contentious dispute cannot be avoided, we will of course also represent your interests before the state courts and before national and international arbitration tribunals.
